

ABOUT EMBRY-RIDDLE

"The Best Aviation and Aerospace University in the World"

At Embry-Riddle Aeronautical University, what we do -- and do best -- is teach the science, practice, and business of the world of aviation and aerospace.

Since it was founded just 22 years after the Wright brothers' first flight, the University and its graduates have built an enviable record of achievement in every aspect of aviation and aerospace.

The curriculum at Embry-Riddle covers the operation, engineering, research, manufacturing, marketing, and management of modern aircraft and the systems that support them. The University engages in extensive research, consulting, and related activities that address the unique needs of aviation, aerospace, and related industries. Residential campuses in Daytona Beach, Florida, and Prescott, Arizona, provide education in a traditional setting, while an extensive network of more than 130 centers in the United States, Canada, Europe, and the Middle East and a Web-based online learning program serve civilian and military working adults.

Embry-Riddle Aeronautical University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award degrees at the associate, bachelor, and master levels. The bachelor degree programs in aerospace engineering and computer engineering at the Daytona Beach and Prescott campuses, along with civil engineering, engineering physics, and software engineering at Daytona Beach, and electrical engineering at Prescott, are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

The bachelor degree curricula in aeronautical science at both residential campuses are accredited by the Council on Aviation Accreditation (CAA). The bachelor degree programs in aviation business administration at both residential campuses are accredited by the CAA and by the Association of Collegiate Business Schools and Programs (ACBSP). The MBA in aviation at the Daytona Beach campus is accredited by the ACBSP.

Embry-Riddle campuses at Daytona Beach and Prescott also provide Army, Air Force and Navy Reserve Officer Training Corps programs preparing young men and women for service in the armed forces of the United States.

Federal Aviation Administration-approved certification programs include maintenance technology (airframe and power plant); flight (private, commercial, instrument, multi-engine, flight instructor, and instrument flight instructor ratings); and flight dispatch.

Embry-Riddle is committed to recruiting and retaining talented, qualified and motivated students who are dedicated to making a difference. Our success will depend on our ability to create an ample endowment for scholarship and fellowship support.
